DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-8 and 11-14 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8 and 11-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Jung 6507377.

Regarding claims 1, 5 and 11, Jung teaches a display device/ electronic apparatus comprising: a display unit having a plate (fig. 1 element 8 surrounds the plate however the plate is unlabeled); a chassis (figs 1-3 element 14) surrounding peripheral edges of the plate and supporting the peripheral edge of the plate, a bezel (fig. 1-3 element 8) formed on the chassis and holding the peripheral edges of the plate and a cover enclosing a back-side surface of the display unit (figs. 1-3 element 12), the bezel being provided with an extension portion (near 16) that extends from a side of the display unit and outwardly projects beyond an end of the chassis at a level of an upper

surface of the cover, wherein the display unit has a height equivalent to a total height of the display unit and the cover unit (see fig. 3).

Regarding claim 2, 6, and 12, Jung teaches the bezel extension portion is disposed in a vicinity of a base portion of the display unit (fig. 3 part of element 8 near element 16).

Regarding claim 3, 7, and 13, Jung teaches the display unit arranged in a rectangular formation (see fig. 1) and the bezel extension portions (10) extending from a lateral side of the display unit.

Regarding claim 4, 8 and 14, Jung teaches an inside space surrounded by end surfaces of the display unit and cover, formed beneath a backside surface of the bezel extension portion, and an electronic part (6) disposed within the inside space.
